a comprehensive guide and **handbook 2009/10** www.magazine.org

Top Reasons to Advertise in Magazines

Magazines and magazine ads garner the most attention:

BIGresearch studies show that when consumers read magazines they are much less likely to engage with other media or to take part in non-media activities compared to the users of TV, radio or the internet. According to research from JackMyers, when consumers were asked to rate media based on how likely they are to pay attention to the advertising messages, magazines ranked at or near the top of the list. — *see pages 30 and 32*

Magazine advertising is valuable content: Consumers value magazine advertising, according to numerous studies. Yankelovich and Dynamic Logic both report that consumers are more likely to have a positive attitude toward advertising in magazines compared to other media. In addition, consumers are more likely to turn to magazines to search for information across a variety of categories compared to the internet, based on research from MediaVest — *see pages 31, 54, 55, 57 and 66*

Magazines supply credibility: Consumers trust and believe magazines and magazine advertising more than other media. Simmons Multi-Media Engagement Study shows magazines score higher on being “trustworthy” compared to TV or the internet. Other independent research confirms that consumers place significant trust in magazine advertising. — *see pages 29 and 35*

Magazine print and digital audiences are growing: The number of magazine readers as well as the average number of magazine issues read in the past month has grown over the past five years. In addition, magazine website usage is growing faster than web usage overall. — *see pages 7 and 10*

Top Reasons to Advertise in Magazines

Magazine advertising is relevant and targeted: Consumers consider magazine advertising more relevant than advertising in other media. With a range of titles that appeal to a wide variety of demographics, lifestyles and interests, advertisers can hone in on targets that fit their needs. — *see pages 34 and 12*

Magazines are a leading influence on word-of-mouth:

Magazine readers are more likely than users of other media to influence friends and family on products across a variety of categories. Magazines are also most likely to complement the web in reaching social networkers, whom marketers increasingly favor in generating buzz. — *see page 73*

Magazine audiences accumulate faster than you think—and with lasting impact:

The average monthly magazine accumulates approximately 60% of its audience within a month's time, and the average weekly magazine accumulates nearly 80% of its audience in two weeks. — *see page 74*

Magazine advertising sells: Several studies demonstrate that magazines are generally the strongest driver of purchase intent. Perhaps this is because more than half of all readers act on magazine ads, according to Affinity Research. — *see pages 36 and 42*

Top Reasons to Advertise in Magazines

Magazines improve advertising ROI: Based on a recent analysis of cross-media accountability studies, Marketing Evolution found magazines most consistently generate a favorable cost per impact throughout the purchase funnel. Multiple studies confirm that allocating more money to magazines in the media mix improves marketing and advertising ROI across a broad range of product categories. — *see page 43 and 44*

Magazine advertising drives web search, traffic and action taking: BIGresearch proves that magazines lead other media in influencing consumers to start a search for merchandise online, ranking at or near the top by gender as well as by age. In addition, studies from Marketing Evolution, JupiterResearch and the OPA show that ads in magazines or on magazine websites boost web traffic, spur online purchase and offline behavior. — *see pages 70–72*

Magazine advertising drives effectiveness throughout the purchase funnel: Magazines generally contribute more than other media when looking at consumers' purchase decision-making process. As a result, magazines boost the effectiveness of other media at all stages of the funnel. — *see pages 41 and 42*

Magazines deliver reach: Across major demographic groups, the combination of the top 25 magazines delivers considerably more rating points than the top 25 TV shows. — *see page 75*

Magazine Readership Remains Strong

More than 4 out of 5 U.S. adults read magazines.

Magazine audience—including readership among younger adults—has remained strong over the past five years despite the growth of new media options.

Magazine Readers (000)	2004	2008
Adults 18+	179,373	189,681
Index to 2004	100	106
Adults 18–34	58,916	60,461

Number of Magazine Titles

A Magazine for Everyone

Reading a magazine is an intimate, involving experience that fulfills the personal needs and reflects the values of the reader. This is one reason the average reader spends over 43 minutes reading each issue.

For a list of the number of magazines by category, visit **www.magazine.org**.

Number of Magazines 1999 – 2008

year	total*	consumer
1999	17,970	9,311
2000	17,815	8,138
2001	17,694	6,336
2002	17,321	5,340
2003	17,254	6,234
2004	18,821	7,188
2005	18,267	6,325
2006	19,419	6,734
2007	19,532	6,809
2008	20,590	7,383

*Includes, but is not limited to, consumer magazines in North America regardless of publishing frequency.

Number of Magazines with Websites

Magazine Websites Continue to Grow Even as Print Magazines Are Valued

The number of consumer magazine websites has increased 78% since 2005, extending the reach and influence of magazines' editorial and advertising messages to an even wider audience.

Consumers who use both magazine websites and their print counterparts overwhelmingly state that the printed magazine still has value.

Keep up with the latest magazine digital initiatives at www.magazine.org/digital.

Number of Magazines with Websites 2005 – 2009

year	total	consumer only
2005	10,131	4,712
2006	10,818	5,395

Magazines Continue to Target Consumers' Interests

Every year a plethora of new magazines are introduced to satisfy consumers' growing need to be informed and entertained.

The variety of new magazine titles launched each year is a testament to the magazine industry's commitment to meeting the needs and interests of consumers.

New magazine launch announcements are highlighted on a monthly basis at www.magazine.org/launches.

New U.S. Magazine Launches by Category in 2008

18	Metropolitan/Regional/State	2	Art
18	Sports	2	Bridal

The Top 12 Advertising Categories Account for 87% of All Spending

In 2008, Toiletries & Cosmetics was the largest magazine advertising category, followed by Drugs & Remedies, and Food & Food Products, according to the Publishers Information Bureau (PIB).

Magazine rate card reported revenue by class is made available quarterly at www.magazine.org/pib.

Readership by Advertising Unit Type

Recall of Magazine Advertising by Type of Unit, Color and Position

A compilation of studies done by Affinity Research shows that **creative execution affects recall**, as seen in the data for unit size and paper stock.

Comparable recall rates among readers for ads in both the first half and second half of magazine issues demonstrate that **a reader's interest in the magazine is sustained throughout the entire issue.**

Impact of Magazine Ads (average)

*Four color, (including 5th color or metallics)

** "Heavy" defined as any paper weight heavier than run-of-book stock

Source: Affinity Research VISTA Print Rating Service, 2009

Unit Size Affects Ad Impact

MRI Starch finds that unit size has an impact on advertising results. MRI Starch's data show that, **as ad size increased, so did readership.** "Noted" and "read some" scores generally show greater increases than "read most" scores as the number of ad pages increased. This indicates that, though readers may elect not to read a longer advertisement in its entirety, it still has positive impact.

Readership of Multiple-Page Ads – Averages Indexed vs 4-Color Spread Ads

	noted	associated	read some	read most
Spread	100	100	100	100
2-page insert*	105	106	108	107
3-page run-of-book	116	115	124	93
3-page insert	120	121	137	121
3-page gatefold	124	125	139	143
4-page run-of-book	124	123	139	121
4-page insert	118	115	134	121
4-page gatefold	124	127	137	136
6-page run-of-book	136	146	155	129
8-page run-of-book	151	125	197	121
8-page insert	127	127	147	136

* Differs from a spread in that an insert is on a single page but comprises both sides of the same page.

In an Age of Interruption, Magazines Engage

Consumers Pay Attention to Magazines

BIGresearch found that **magazine readers are least likely of all media users to engage in other (non-media) activities** while reading.

In addition, their data show that **when consumers read magazines, they are much less likely to engage in other media**. Only 9% of magazine readers will simultaneously go online, only 14% will listen to the radio, and only one in four (23%) will watch TV.

See page 80 for research that links reader engagement to increased ad recall and action taking.

Consumers Pay Attention to Magazines by percent

In an Age of Interruption, Magazines Engage

Consumers Enjoy Magazine Advertising More Than Advertising in Other Media

Yankelovich reports that **magazines rank #1 out of 16 media for consumers having a positive impression of advertising.** This may be because magazines are second only to video games for consumers enjoying the content at the time they saw the ad. Magazines also rank very highly for the relevance of information in the medium and consumers' overall opinion of the medium (see page 34).

Similarly, magazine readers have a positive attitude to the advertising in the medium, according to research from Dynamic Logic.

Top 5 Ranking (of 16 Media) on Key Ad Performance Areas:

Ads (in this medium) made a positive impression:	1	magazines
	2	in-store
	3	tv
	4	newspapers
	5	radio
Enjoying content (in this medium) at the time I saw the ad:	1	video games
	2	magazines
	3	radio
	4	tv
	5	newspapers

In an Age of Interruption, Magazines Engage

Consumers Like and Pay Attention to Magazine Ads

When consumers were asked to rate media based on how likely they are to pay attention to the advertising messages within their respective environments, magazines were number one for total adults (age 18-64) and a close number two among adults 18-24. Younger adults (age 18-24) proved to be more attentive than adults (age 18-64) to ads in all media.

People are more likely to agree that the advertising in magazines enhances their overall media experience, more so than advertising on TV or on the Internet.

Ads Enhance Overall Enjoyment of

Source: JackMyers Emotional Connections Survey, 2007

In an Age of Interruption, Magazines Engage

Consumers Feel Positive About Magazine Advertising

Consumers—including younger consumers—consider magazine advertising useful and valuable.

Consumers more strongly attributed negative attributes to advertising in broadcast media and the Internet:

- Print advertising, including magazines, intruded the least and was considered the most trustworthy
- Consumers viewed advertising on TV, radio and the Internet as repetitive and inconvenient
- TV, radio and Internet advertising did not stand out—30% or more of all consumers believed that “all ads in this medium are alike”

Consumer Experiences with Advertising by percent

Positive Drivers	age	magazines	tv	radio	newspapers	internet

Magazine Advertising and Editorial Get Readers to Act

More than half (56%) of readers took action on magazine ads or had a more favorable opinion about the advertiser because of magazine advertising, according to the latest research from Affinity's VISTA Print Effectiveness Rating Service.

An analysis of Affinity data over the past four years shows magazine advertising recall and action-taking have increased during this time (see page 37).

Similarly, more than two out of three (68%) readers took action based on editorial content. The research shows that magazine engagement goes far beyond just “feeling”—it prompts consumers to act.

Actions Readers Took or Plan to Take as a Result of Exposure to Specific Magazine Ads

Consider purchasing the advertised product or service	21%
Have a more favorable opinion about the advertiser	12
Gather more information about advertised product or service	12
Visit the advertiser's website	11
Visit a store, dealer or other location	9

Magazines Deliver More Ad Impressions Than TV or Web in Half-Hour Period

New research from McPheters & Company shows that for each half-hour spent with the medium:

- Magazine readers are exposed to twice as many ads as internet users and four times as many as primetime TV viewers
- As a result, **magazines effectively deliver more than twice the number of advertising impressions as TV and six times the number of ad impressions as the internet**

This study demonstrates that time spent with a medium is not a good predictor of advertising effectiveness.

Magazines Deliver More Ad Impressions than TV or the Internet in a Half-hour Period

	no. of ads exposed	no. of ads absorbed
Magazines (full-page, 4C)	65.1	24.4
TV (30-second primetime)	16.2	11.7
Internet (standard banner)	27.8	3.8

Accountability: Magazines Get Results

Magazines Lead in Ad Influence Relative to Time Spent

Magazines outperform other media when looking at the “Time-Ad Impact Ratio.”

A new analysis of time spent with media focuses on the influence of advertising in a medium relative to the more common metric of time spent. This analysis, dubbed the “Time-Ad Impact Ratio,” is made up of two components:

- Share of time consumers spend with each medium in an average day, and
- The percentage of U.S. consumers who said advertising in a medium has the most influence on their buying decisions

Time-Ad Impact Ratio

The ad influence of a medium relative to time spent with that medium

Time-Ad Impact = Media Influence/Share of Total Time Spent

Sources: MRI MediaDay, 2008. Deloitte “State of the Media Democracy” Study, 2008

By dividing a medium’s influence by the share of total time spent with that medium, a Time-Ad Impact Ratio can be calculated. Results show advertisers that **magazines’ ratio is more than two time higher than that of TV or the internet and more than five times higher than that of radio.**

Accountability: Magazines Get Results

Magazines Boost the Power of Other Media

Dynamic Logic's analysis revealed that **magazines play a leading role in boosting overall advertising effectiveness**. The combination of TV and magazines provided significantly more lift (versus TV alone) than did TV plus online.

Magazines Improve Marketing and Advertising ROI

For many of the accountability studies it conducted, Marketing Evolution made recommendations to marketers to reallocate their media mix. They advised that:

- Share of spending for magazines should increase as much as 30 points in 11 of the 16 studies (69%)
- Share of spending for online should increase as much as 10 points in 7 of the 16 studies (44%)
- Share of spending for TV should increase as much as 10 points in 3 of the 16 studies (19%)

When marketers implemented the recommended reallocation of media, their average return on investment (ROI) increased 23% at comparable budget levels.

Magazines Most Consistently Produce a Low Cost per Impact Throughout the Purchase Funnel

When analyzing ROI across 38 cross-media accountability studies, Marketing Evolution found:

- TV leads in cost efficiency for brand awareness with magazines a close second
- Magazines generated a superior cost-per-impact for brand familiarity with TV and online performing at almost double magazines' CPI
- **For purchase intent magazines yielded a far more efficient cost per impact than TV or online**

Magazines outperformed TV and online when looking at the #1 ranking as well as the combined ranking for #1 and 2 across the individual categories studied—auto (page 48), electronics (page 52), entertainment (page 53), and pharmaceuticals (page 66).

Magazines Influence Purchase Behavior Across Categories

When looking at a variety of product categories, BIGresearch found that **magazines are one of the top four out of 17 possible media choices influencing the purchases of U.S. adult consumers.** The categories include apparel, home improvement, car/truck, medicines and electronics.

The finding holds for the 18-to-24 and 25-to-34 year-old segments even though such youth-centric media as text messaging, video on cell phones, instant messaging and online video game advertising were included among the 17 media studied.

Magazines Are More Efficient Than Other Media at Critical Lower Stages of the Auto Purchase Funnel

Across six studies encompassing domestic and imported cars and trucks, including new launches and repositioning of existing brands, analysis by Marketing Evolution showed:

- Magazines had a superior cost per impact (CPI) for brand familiarity—two-thirds that of TV and nearly 40% less than online
- **Magazines also had the lowest CPI for purchase intent**—three-quarters that of TV and about one-third the CPI of online

To see how magazines produced the lowest cost per impact throughout the purchase funnel across 38 cross-media accountability studies, see page 44.

Cost Per Impact (CPI) by Medium by index

TV = 100. Lower Index = Better Performance.

Accountability: Magazines Get Results

Magazines Exert Sizable Influence on Auto Purchasers

If you look at which media customers say influence them to purchase a car and then compare that to the allocation of advertising dollars, you will see auto makers are under-spending on magazines and the web, while over-allocating dollars to TV.

Magazines command about 17% of the influence to purchase a car, but garner only about 12-13% of the ad budget.

Above average users of magazines and the internet are more likely to be Super Influential Consumers for automotive purchases of friends and family, including cars, trucks/vans/SUVs, and aftermarket products.

For information on influencing the purchase of environmentally-friendly vehicles see page 58.

Consumers of Entertainment Products Choose Magazines

Percent Using Each Medium Once a Week or More Often for Entertainment/Celebrity Information

Source: MediaVest Print/Digital Study, 2008

Among those who use each medium once a week or more for entertainment/celebrity information, more than half (55%) use magazines compared to 37% who use the internet.

Magazines readers provide a key target for entertainment advertisers.

Consumers of a variety of entertainment products tend to be above average magazine readers and below-average TV viewers.

These consumers also tend to be heavy users of the Internet.

Top Media Quintiles for Entertainment Products by index

Pharmaceutical: Magazines Are a Prescription for Positive Results

The MARS OTC/DTC study revealed that **magazine readers are by far the most likely to take action on healthcare ads when compared to the users of any other medium.** One example, magazine readers were twice as likely as the general public to discuss an ad with their doctor.

In addition to the data presented on the chart, magazine readers were:

- Two and a half times more likely to return a sample card
- Nearly twice as likely to discuss an ad with a friend or relative compared to the general public

Pharmaceutical: Magazines Are a Top Healthcare Resource for Consumers

Magazines — including both editorial content and advertising — are the leading sources of healthcare information for consumers.

According to MARS OTC/DTC Study:

- Three of the top 15 most valued sources for healthcare information are magazine-related consumer media
- Magazine articles surpass the editorial content of other consumer media as a leading source (except for brochures/pamphlets in-office)
- Magazine and television ads rank highest as top advertising resources (except for ads in doctors' offices)

Magazines Accumulate Reach Faster Than Commonly Believed—and When Consumers Choose

Magazine reach begins accumulating audience before the actual on-sale date.

The average monthly accumulates approximately 60% of its audience within the first month. The average weekly magazine accumulates 80% of its audience within the first two weeks.

Because consumers control their media experience with magazines, magazines provide “on-demand” audience accumulation.

Note: The on-sale date is the actual date the magazine will appear on the newsstand or is likely to arrive in subscriber households. For weeklies it is generally one week earlier than the cover date of the magazine. For monthlies, the on sale date is generally weeks ahead of the cover date.

Magazine Audience Accumulation Over Time

Magazines Appeal to Diverse Readers

The MPA Market Profiles offer an in-depth look at the African-American/ Black, Asian American, Hispanic/Latino and Teen markets. Each group is an important, growing segment of the U.S. population that uniquely redefines the culture of the United States in areas such as food, apparel and music. Not surprisingly, each group displays specific magazine readership patterns.

For more on Market Profiles, visit www.magazine.org/marketprofiles.

Source: MRI, Fall 2008; ABC; National Directory of Magazines; Oxbridge Communications, 2009; MRI Teenmark, 2008; Carat Insight, 2008

- More than eight out of ten **African-American/Black** adults (84%) are magazine readers. They read an average of 13.6 issues per month, compared to 9.7 issues per month for all U.S. adults.
- More than two out of three **African-American/Black** adults (69%) who read magazines are between the ages of 18 to 49, compared to only 62% of the U.S. adult population.
- There were on average over 100 titles targeting **Asian-Americans** in the five-year period from 2004 to 2008.
- **Asian-American** magazine readers are younger, more affluent, and better educated than magazine readers overall.
- More than 75% of adult **Hispanic/Latinos** read magazines. They read an average of 10.0 issues per month, slightly higher than the U.S. average.
- From 2004 to 2008, the total paid and verified circulation for ABC-measured **Hispanic/Latinos** magazine titles grew by 22.6%.
- Three-quarters of **teens**, 75%, read magazines.
- A cross-media comparison conducted by Carat Insight found that the top 25 magazines lead the top 25 primetime TV shows in reaching **teens** age 12 to 17.

Individual Actions Taken in Response to Magazine Advertising

Top/bottom 2 box scores among total respondents
Source: Affinity, 2006

*Findings from Northwestern University's Magazine Reader Experience Study are available at www.magazine.org/research.

Increasing Creative Effectiveness

Engagement Findings Can Be Used to Predict Creative Impact

Results tested in the lab and marketplace confirm that **engagement attributes can be utilized to help understand and even predict the effectiveness of magazine advertising creative**. Six brands — two from each of three different categories — were used for testing in the lab, while two brands — Bayer Aspirin and Lincoln — participated in marketplace tests.

These results were utilized to develop a “Creative Diagnostic Tool,” available at www.magazine.org/accountability.

Increasing Creative Effectiveness

Including a URL in Magazine Ads Increases Web Visits

When a URL was included in the magazine advertising creative, the percent change in visits tripled from two to six points in Marketing Evolution's research.

Percent of Group to Visit Brand Website

Analysis completed at the study level. 4 studies include URL and 5 studies do not include URL.
 Aggregated base sizes Control n = 21,410 Exposed n = 22,619
 Source: Marketing Evolution, 2004 – 2007

Affinity found that **magazine ads with URLs are more likely to drive readers to advertiser websites** across a range of magazine genres.

Ads With URLs Compared to Ads Without URLs Drive Readers to Advertiser Websites by index

Action Index: Visit Advertiser's Website
 Base: Actions taken based on respondents recalling specific ads
 Source: Affinity's VISTA Print Effectiveness Rating Service, 2007

Magazines Show Immunity to Ad Wearout

VISTA research, using examples from two recent magazine ad campaigns where the same creative approach was employed over an extended period of time, found that the ads did not exhibit any measurable declines in effectiveness.

Magazine Ad Recall and Actions Stay Strong Across Time

Ambien CR

Time Period: 4 quarters. Measured ad occurrences: 35

average recall plan to ask doctor about the product

Johnson's Baby Oil

Time Period: 3 quarters. Measured ad occurrences: 22

average recall plan to purchase the product

Base: Actions Taken Based on Readers Recalling Specific Ads

ACCOUNTABILITY AND EFFECTIVENESS

Case Studies Nearly 250 examples show how advertisers have successfully used magazines: www.magazine.org/casestudies.

NEW! Category Fact Sheets downloadable one-sheets show how magazines drive results across 17 categories.

Accountability Studies from Affinity Research, Dynamic Logic, Hudson River Group and more analyze media mix dynamics and provide compelling proof that magazines positively impact sales. PowerPoint slides highlighting magazines' key role in driving consumer action are available online at www.magazine.org/accountability.

Measuring Media Effectiveness Across the Purchase Funnel, research from Marketing Evolution, demonstrates magazines' significant contribution across the purchase funnel.

Creative Diagnostic Tool makes magazine creative accountable based on feedback from advertisers. The tool can provide insights quickly and detail the learning on media engagement.

Quantifying Influentials' Relationship with Magazines reveals that Influentials—the 21 million Americans who influence the decisions of the rest of the population—rank magazines as their key source of news and information and find magazine advertising valuable.

NEW! Magazine Myths Versus Reality Third party research is used in these 3 topline to debunk common misperceptions about media's strengths in driving consumer action, media efficiency and magazines' role at retail.

NEW! Time-Ad Impact Ratio links time spent with media to ad impact, using third party sources helps marketers evaluate time spent in a way that aligns with their desire for better results.

Accountability II: How Media Drive Results and Impact Online Success A compilation of accountability research, based on multiple independent studies, the strengths of magazines and their role with other media.

Accountability: A Guide to Measuring ROI and ROO Across Media examines accountability research across media.

CREATIVE

Kelly Awards Gallery Guide, video and interactive online gallery (kellyawardsgallery.org) showcase the best magazine ads and the marketplace results they achieved.

The Power of Print: Starch Ad Database and Tools is a presentation that surveys the usefulness of Starch Ad Readership studies and discusses the "Ten Principles for Effective Print Advertising."

READERS AND READERSHIP

The Value of Magazine Readership: Reader Dynamics and Ad Impact on Readers of Pass-Along Copies shows that readers value pass-along copies and take action at a similar rate as readers overall.

The Value of Magazine Readership: Reader Dynamics and Ad Impact Among Paid and Nonpaid Readers demonstrates that how much a consumer pays for a magazine or how the magazine was acquired does not affect the level of magazine engagement or likelihood to act on the advertising.

African-American/Black, Asian-American, Hispanic/Latino and Teen Market Profiles consolidate research on these targets.

ENGAGEMENT

Engagement: Understanding Consumers' Relationships with Media a media-neutral approach that shows how consumers connect with advertising-supported media: television, newspapers, radio, the Internet and magazines.

Understanding Magazine Circulation: A Guide for Advertising Buyers and Sellers offers insights on key strategic concepts in circulation to help facilitate communication between advertisers and publishers.

Magazine Reader Experience Study examines what consumers experience when they read a magazine and how those experiences drive readership and advertising impact. The research, conducted by the Media Management Center at Northwestern University, offers significant insights for advertisers, consumer marketers, publishers and editors.

ENVIRONMENT

MPA Environment Handbook An in depth educational guide on environmental policies and procedures of interest to our magazines and companies. The handbook includes the many facets of magazine manufacturing — from harvesting trees, to the printing, distribution, and final disposition by our readers.

Forest Certification An authoritative review and analysis of forest and forest product certification schemes in North America to help publishers understand paper purchasing considerations.

GENERAL

2008-2007 Handbook of Consumer Marketing Practices contains important information on effective circulation practices, the value of readership, subscription marketing regulations as well as overviews of the retail picture for magazines.

Media Research Index puts more than 1,000 research studies from 1950 to 2003 at your fingertips. The index is available online at www.magazine.org/mediaresearchindex and free of charge to MPA members and advertisers. Listings are searchable by media type, study type, author, title or keyword. Also available in two-volume printed version.
